ELECTRONICS AND COMMUNICATIONS IN JAPAN
Part 2: Electronics

VOLUME 71
CONTENTS FOR 1988

NUMBER 1

Page

Teruhito Mishima, Kenji Hisadome and Ichiro Sakuraba: Nonlinear Susceptibility of Cesium and Sodium Atoms for Frequency Upconversion from 10-μm Atmospheric Window to the Visible 1

Minoru Inamura: Analysis of Remotely Sensed Image Data by Means of Category Decomposition 11

Koosuke Harada and Takashi Nabeshima: High-Frequency Switching Regulator Controlled by Magnetic Amplifier 23

Kohei Nakamura: Frequency Stability of Emitter Follower Type Crystal Oscillators . . 32

Tetsuo Itoh, Toshiharu Matsuzawa, Kazuya Kadota and Shuichi Hanashima: A Three-Dimensional Resist Shape Simulator and Its Application to Submicron VLSI Process 41

Kunio Sawaya, Tadahiko Maeda, Saburo Adachi and Yasuto Mushiake: Electromagnetic Fields Excited by an Electric Dipole Located Over a Conducting Concave Spherical Surface 50

Takashi Hotta, Hideo Maejima, Masahiro Iwamura, Kouzaburou Kurita, Masahiro Ueno, Ikurou Masuda, and Atuo Hotta: Hi-BiCMOS 32-bit Execution Unit 61

Yoshiro Tomabechi and Kazuhito Matsumura: Analysis of Reflection and Transmission Characteristics of Step Discontinuity in Rectangular Dielectric Waveguides . . 72

Kazunori Moriki, Hidetoshi Nakahara, Takeo Hattori and Kenichi Iga: Single Transverse Mode Condition of Surface-Emitting Injection Lasers 81

Osamu Shimomura: Growth and Evaluation of Large KDP Single Crystals for High-Power Harmonic Generation by Temperature Decrease Method 91

Hiroharu Fujita and Shinya Yagura: A New Method for Measuring Plasma Potentials with a High Time Resolution 102

NUMBER 2

Noboru Tanizuka: A Phenomenological Consideration on E × B Discharges 1

Tomonobu Hata, Yukihiro Kamide, Shigeki Nakagawa, and Kouji Hattori: Characteristics of a-Si Films Prepared by Compressed Magnetic Field (CMF)-Magnetron Sputtering . . 9

Yasutaka Shimizu and Kyoji Murakami: Characteristics of Leaky Surface Acoustic Waves on $LiNbO_3$ and the New Cut 19

Noboru Tanizuka: Energy Theory on Discharges of E × B Type Devices 30

Hiroyuki Umeda, Kenichiro Takahashi, and Yoshiaki Shiraga: Maximum Available Power Gain of Microwave-Transistor Amplifier Under Large-Signal Operation 40

Masaya Nagata, Masato Ohtaka, and Takao Kobayashi: Wide Frequency-Modulation Operation of Semiconductor Lasers Using a Composite-Optical Cavity 53

Yoshifumi Yamada, Takao Goto, and Kunio Tanaka: NMR Fast Line-Scan Imaging Using a Line-Shaped Focusing Field 64

Hideaki Watanabe, Yoshiyuki Uehara, and Akira Noguchi: Inverse Scattering Method for One-Dimensional Inhomogeneous Lossy Medium Using Linear Prediction Method 73

Noboru Tanizuka: A Phenomenological Consideration on E × B Discharges 1

Tomonobu Hata, Yukihiro Kamide, Shigeki Nakagawa, and Kouji Hattori: Characteristics of a-Si Films Prepared by Compressed Magnetic Field (CMF)-Magnetron Sputtering . . 9

Yasutaka Shimizu and Kyoji Murakami: Characteristics of Leaky Surface Acoustic Waves on $LiNbO_3$ and the New Cut 19

Noboru Tanizuka: Energy Theory on Discharges of E × B Type Devices 30

Hiroyuki Umeda, Kenichiro Takahashi, and Yoshiaki Shiraga: Maximum Available Power Gain of Microwave-Transistor Amplifier Under Large-Signal Operation 40

Masaya Nagata, Masato Ohtaka, and Takao Kobayashi: Wide Frequency-Modulation Operation of Semiconductor Lasers Using a Composite-Optical Cavity 53

Yoshifumi Yamada, Takao Goto, and Kunio Tanaka: NMR Fast Line-Scan Imaging Using a Line-Shaped Focusing Field 64

Hideaki Watanabe, Yoshiyuki Uehara, and Akira Noguchi: Inverse Scattering Method for One-Dimensional Inhomogeneous Lossy Medium Using Linear Prediction Method 73

Page

Masanori Matsuhara: Improved Integral Equation Method for Electromagnetic Scattering Problems 82
Hiroshi Yoshikawa, Akihiko Sugata, Minoru Watanabe, and Yutaka Ohno: Distributed Fluid Sensor Using Eccentrically Cladded Fibers 89
Tsuyoshi Dobashi, Toshiji Umezawa, and Katsutaka Sasaki: Effects of Heat-Treatment on Dielectric Properties of anodized Al-Ta Double Oxide Layer Thin-Film Capacitors 98
Shinichi Takagi and Takuo Sugano: InP Metal-Insulator-Semiconductor Field-Effect Transistor Using Vacuum-Evaporated Films 106

NUMBER 3

Yusuke Nakano, Sadao Sugimoto, and Hitoshi Arai: A Method to Measure Position and Attitude of a Tunneling Machine 1
Shin-ichi Furukawa and Yahei Koyamada: Launching and Receiving Conditions for Optical Fiber Loss Measurements Using an OTDR 10
Kazuo Ono and Shinnosuke Sawa: A Method for Analyzing Coupled Inhomogeneous Waveguides Supporting Two Modes and Its Applications 23
Shigeo Satou, Kunio Hane, and Tokio Suzuki: High-Convergence Matrix-Solving Scheme for Device Simulator 36
Tohru Hatta, Takashi Kusakabe, and Takahiro Asai: Influence of Crosstalk in Transmission Line on Accuracy in Inductive Radio System for Detecting the Position of Linear Motor Vehicles 46
Hiroshi Itoh, Kazushi Hotta, Hidehiko Takara, and Keisuke Sasaki: Phase-Matched Second Harmonic Generation of an Nd:YAG Laser in a 2-Methyl-4-Nitroaniline (MNA) Single-Crystal Thin-Film Waveguide 59
Yoshifumi Yamada, Kunio Tanaka, and Zenmon Abe: NMR Fresnel Transform Imaging Using a Scannable Nonlinear Field Gradient 64
Jun Nitta and Kenichi Iga: Analysis of the Operation of Surface-Emitting-Type Optical Threshold Device 73
Keiji Tsukada, Takuya Maruizumi, and Hiroyuki Miyagi: ISFET Incorporated in a Differential Amplifier 82
Junko Akagi, Jiro Yoshida, and Mamoru Kurata: Comparison of Characteristics Between Inverted and Normal Structure Heterojunction Bipolar Transistors 89
Tetsuro Nozu and Junko Akagi: DC and Switching Characteristics of Inverted Structure AlGaAs/GaAs HBTs 96
Chiaki Takano, Kenichi Taira, Hiroji Kawai, and Michio Arai: Effect of Compositionally Grading on DC Characteristics of AlGaAs Heterojunction Bipolar Transistors 102
Takashi Taguchi, Yoshinobu Sugiyama, and Munecazu Tacano: AlGaAs/GaAs Heterojunction Hall Device 110

NUMBER 4

Yoshinobu Sasaki, Hiroaki Morimoto and Makio Komaru: Study of GaAs FET Process Using Focused Ion Beam Lithography 1
Takashi Egawa, Yoshiaki Sano, Horishi Nakamura and Katsuzo Kaminishi: Annealing Technology Under Arsenic Overpressure for GaAs LSI—Influence on Dislocation and Threshold Voltage 10
Nobuko Araki-Mishima and Ken Yamaguchi: Two-Dimensional Numerical Analysis of GaAs MESFET with a p-Buffer Layer 19
Mayumi Hirose, Yasuo Ikawa and Nobuyuki Toyoda: Structure Dependence of the Short-Channel Effect in GaAs MESFETs. Two-Dimensional Device Simulation 26
Koutarou Tanaka and Yasushi Kawakami: A MESFET Model for the Design of GaAs Digital Integrated Circuits. 37
Masafumi Shigaki and Shigeru Yokogawa: Study on GaAs Monolithic Dynamic Divider . . 44
Hiroaki Ohnishi, Naoki Yokoyama and Akihiro Shibatomi: Transport Analysis of a Resonant-Tunneling Hot Electron Transistor (RHET). 50
Toshiyuki Usagawa and Nobuko Mishima Araki: Device Analysis of Two-Dimensional Electron Gas (2DEG)FET 59
Kazuhiko Honjo, Mohammad Madihian and Shigetaka Kumashiro: Systematic Design Approach for AlGaAs/GaAs HBT Using Two-Dimensional Device Simulator and Circuit Simulator . 72

Page

Yoichi Suzuki and Eikichi Yamashita: Coherent Backscatter-Induced Noise in Optical Fiber Gyroscopes with Serrodyne Modulation 81
Shinnosuke Sawa: A Design Theory of Mode Transducers Utilizing Coupling Effects of Multimode Coupling System and Its Applications 89
Shigetaka Nomura, Saburo Endo and Taizo Irie: Method of Materials Design for I-III-VI_2 Chalcopyrite-Type Mixed Crystal Semiconductors 101

NUMBER 5

Toshio Irino, Yoshimasa Shirosaki, and Yasutaka Shimizu: Propagation of Boundary Acoustic Along a ZnO Layer Between Two Materials 1
Norihiko Kotani, Tsuyosi Yamano, Junji Tateishi, Yoichi Akasaka, and Satoru Kawazu: Computer-Aided Processing System (CAPS) for VLSI Development 13
Takakuni Douseki and Yasuo Ohmori: A High-Speed SRAM Using BiCMOS Technology 24
Makoto Tsutsumi: Magnetically Tuned Microwave Oscillator Using the YIG Film and Its Applications 33
Nobuo Kuwaki, Masaharu Ohashi, Chihaya Tanaka, and Naoshi Uesugi: Evaluation of Mode-Field-Diameter Definitions and Conditions for Single-Mode Fibers by Transmitted Field Pattern Methods 40
Isamu Kato, Ryoichi Hara, and Yasuyuki Sugiyama: Multilayer Thin-Film Waveguide Polarizer with Metal Cladding 48
Hiroyuki Uenohara, Kenichi Iga, and Fumio Koyama: Analysis of Electron Wave Reflectivity and Leakage Current of Multi-Quantum Barrier: MQB 53
Jin-ichi Matsuda, Mitsunori Kubo, Chiharu Iriguchi, Kazuo Kato, and Takao Masuda: Monte Carlo Simulation of Energy Broadening in Electron Beams 61
Akemi Hamada, Toru Toyabe, and Eiji Takeda: Development of HOT-CARRIER Simulator H^2-CAST and Its Application to LDD 75
Kikuo Watanabe, Masataka Kato, Minoru Nagata, and Takahiro Okabe: Radiation Effects in SiO_2/Si Structures 83
Masashi Ono, Masami Hane, Kunio Hane, and Tokio Suzuki: Finite-Element Analysis of Convective Diffusion Equation for Semiconductor Problems Using Conjugate Gradient Method 93
Teruhiro Shiono, Kentaro Setsune, and Osamu Yamazaki: Elliptical Micro-Fresnel Lenses Fabricated by Electron-Beam Writing Technique 100

NUMBER 6

Yoji Sato, Kazuhiko Abe, Chinami Kawamoto, and Hiroshi Kuwano: Conduction Mechanism of Polycrystalline Silicon Thin-Film Transistors 1
Masahiro Kume, Masumi Takeshima, Hirokazu Shimizu, Takashi Sugino, Kunio Itoh, and Gota Kano: Simulation Analysis of Semiconductor Laser Operation 9
Kojiro Koyanagi, Teruhito Mishima, and Ichiro Sakuraba: Technique for Determining the Refractive Indices and Oscillator Strengths with the Angle Phase-Matching Conditions in Optical Four-Wave Sum-Mixing 25
Takao Matsumoto, Ryo Nagase, and Haruo Kano: Proposal for a Fiber-Optic Endlessly Rotatable Fractional Wave Device and Its Applications to Lightwave Technologies . . 36
Masayasu Anzai: Anomalous Charging Characteristics of Se Photoreceptor and Its Stabilization in High-Speed Reversal-Development Electrophotography 48
Toshio Irino, Yasutaka Shimizu, and Takaya Watanabe: Zero Slope Temperature SiO_2/$LiTaO_3$ Structure Substrate for Stoneley Waves 55
Atsuo Watanabe, Atsushi Hiraishi, Takahiro Nagano, Ikuro Masuda, and Takahide Ikeda: Proposal of High Speed Bipolar-CMOS merged VLSI Technology and Its Future Prospect 63
Kikuo Watanabe, Masataka Kato, Minoru Nagata, and Takahiro Okabe: Radiation-Hardened Silicon Surface Passivation Film 74
Osami Wada and Masamitsu Nakajima: A New Numerical Analysis for Oversized Planar Waveguide Circuits. Iterative Method by Use of a Boundary Element Source Matrix 83
Atsuhiro Nishikata and Yasutaka Shimizu: Analysis for Reflection from Coaxial End Attached to Lossy Sheet and Its Application to Nondestructive Measurement 95

NUMBER 7

Page

Kosei Maemura and Teruyuki Shimura: A 1-GHz Band Low-Power Dissipation GaAs Prescaler IC 1

Kiyoharu Seino, Tadashi Takagi, Yukio Ikeda and Takahide Ishikawa: A 2~18-GHz Band Distributed MMIC Amplifier with Single Supply Bias Network 10

Koozaburoo Kurita, Takasi Hotta, Masahiro Ueno and Atsuo Hotta: Very High-Speed ROM Using Bipolar/CMOS Technology 18

Mitsuo Hano: Finite-Element Solution of Three-Dimensional Resonator Problems. Novel Rectangular Parallelepiped Elements 27

Hideaki Yamakawa, Isao Watanabe, Seiji Uchiyama, Fumio Koyama, and Kenichi Iga: Fabrication and Characteristics of GaInAsP/InP Surface-Emitting Laser with Circular Buried Heterostructure 35

Shinnosuke Sawa, Kazuo Ono and Tadashi Ryoshima: Fabrication of Optical Waveguides in Soda-Lime Glass by Field-Assisted Potassium Ion Migration and the Index-Profile Formation Process 41

Norihiro Umeda: Observation of Elliptical Motion in the Torsion Coupler of Ultrasonic Motor Using Optical Heterodyne Interferometer 49

Ryozo Kishimoto and Masatoyo Sumida: Design for SMF Laser Diode Module Using Thick Lens 56

Kazutami Tago: Semiconductor Device Simulation Method Using Boundary-Fitted Curvilinear Coordinates and the Voronoi Discretization 65

Yoshiyuki Naito, Jifang Yin and Tetsuya Mizumoto: Electromagnetic Wave Absorbing Properties of Carbon-Rubber Doped with Ferrite 77

Naohisa Komatsu and Yuzo Tsuchiya: Technology of Cable Transfer System for Error-Free Digital Transmission 84

Mitsuhito Matsubara, Katsumi Saito and Kenji Kawanishi: Thermomagnetic Writing Characteristics of Holograms on Amorphous Magnetic Films and Application to Optical Matched Filtering 95

NUMBER 8

Narumi Inoue and Yoshizumi Yasuoka: Detection of CH_3OH and CO_2 Lasers by Antenna-Coupled Point-Contact Schottky Diodes 1

Hideo Tanaka: Influence of Low-Frequency-Spectrum Elimination on Reproduced Waveforms in MFM and ZM Coding Methods 11

Kenzo Watanabe and Hiroki Matsumoto: Switched-Capacitor Sequential-Flash Data Converters 22

Kenichi Nishio, Yoshiju Watanabe, Shigetaka Takagi, Takeshi Yanagisawa, Makoto Furihata, and Minoru Nagata: A Realization of Monolithic Variable Integrators and Their Application to Automatically Tunable High-Frequency Active Filters . . 32

Masaharu Ohashi, Nobuo Kuwaki, Chihaya Tanaka, Naoshi Uesugi, and Yukiyasu Negishi: Characteristics of Dispersion-Shifted Dual-Shaped Core Fibers 43

Hajime Matsumura and Haruhiko Mizuno: Design of Microwave Combiner with Waveguide Ports 53

Kohji Toda and Koichi Mizutani: A Lamb Wave Device for Quadrature-PSK Modulation and Demodulation 62

Mitsuo Hano: Vector Finite-Element Solution of Anisotropic Waveguides Using Novel Triangular Elements 71

Kenichi Onda, Koojin Abe, Yasuo Matsuda, and Hisao Amano: Analysis and Eliminating Method for Undesirable Setting of Magnetic Amplifier on Single-Ended DC-to-DC Converter 81

Nobuyuki Hiratsuka and Mitsuo Sugimoto: Amorphous Cobalt Ferrite Films with High Perpendicular Anisotropy 95

Isao Minowa: Influence of DC Bias on Nonlinear Distortion of Contacts 103

NUMBER 9

Page

Tadashi Haibara, Michito Matsumoto, Mitsuru Miyauchi, and Masataka Shirai: Design of Fiber Holder for Optical Fiber-Ribbon Splice 1
Kenji Matsushita, Eiji Shimizu and Hiroaki Kitamura: Photocoupler Systems Using Laser Diode 11
Akira Fuke, Katsuhiko Masuda, and Yasuhiro Tokita: High-Power He-Cd^+ White Light Laser 19
Terukazu Sato, Tadao Nakano, and Koosuke Harada: Parallel Operation of Peak-Current-Controlled Forward-Type DC-DC Converters 28
Koichiro Sawa, Makoto Hasegawa, and Kunio Miyachi: Influence of Arc Discharge Types on Contact Resistance of Ag-Pd Alloys 38
Hiroharu Fujita, Hironobu Ueno, Masamitsu Nagano, and Hisao Matsuo: Effect of Plasma Properties on the Preparation of Tin Oxide Thin Film by Means of dc Planar Magnetron Plasma CVD 49
Kyoshiro Seki, Hiroshi Osada, Jun-ichi Shida, and Koichi Murakami: Bidirectional Characteristics and Applications of Temperature-Sensitive Magnetic Semiconductor 58
Shinji Onga, Kohichi Kato, and Kenji Taniguchi: A New Two-Dimensional Process Simulation System HITOP 66
Hideto Hidaka, Kazuyasu Fujishima, Masaki Kumanoya, Hideshi Miyatake, Katsumi Dosaka, Yasumasa Nishimura, and Tsutomu Yoshihara: On-Chip Multibit-Test Scheme for VLSI Memories 78
Shigeki Sawada, Keiichiro Shimizu, and Kenji Manabe: Optimization of Mask Layout for High-Speed IIL Device 88
Hiroyuki Toda, Masamitsu Haruna, and Hiroshi Nishihara: Optical Integration of a Fiber Laser Doppler Velocimeter 96

NUMBER 10

Katsumi Fukumoto and Masamitsu Nakajima: Relation between the Loading Characteristics and the Mutual Synchronization Characteristics of Microwave Oscillators . . . 1
Takaya Watanabe and Yasutaka Shimuzu: High Stable SAW Devices on LST Cut of Quartz . 12
Masahiro Hashimoto: Principles for Modal Waves in Guided Wave Optics 19
Michihiko Inaba, Nobuo Iwase, Seiichi Hirata, Makoto Gonda, and Yasuhiro Imai: Direct Formation of Solder Bump on Al Pad Using Ultrasonic Soldering 32
Ryuuma Hirano, Kentaro Setsune, Akihisa Yoshida, and Takashi Hirao: Fabrication of Polycrystal Silicon Thin-Film Transistors by Ion Shower Doping Technique 40
Shinzo Muto, Akitoshi Ando, Osamu Yoda, Takayuki Hanawa, and Hiroshi Ito: Tunable Laser Using a Sheet of Dye-Doped Plastic Fibers 47
Wataru Nakashima, Eiji Nagamura, and Teizo Aida: Measurement of Three-Dimensional Shape and Section of Object on Turntable by Position-Sensitive Device 53
Kazushige Nakazawa, Takashi Hinata, Toshio Hosono, and Shinichi Furukawa: Single-Mode Optical Fibers with Zero Total Dispersion at Wavelength 1.3 and 1.55 μm. Fiber with α-Power Index Core and Triple Clad 67
Yasunori Nakata and Masanori Koshiba: Finite-Element Analysis of Plane Wave Diffraction from Metallic Gratings with Arbitrary Complex Permittivity 80
Katsuyuki Tanaka, Makoto Tsutsumi, and Nobuaki Kumagai: Millimeter Wave Dielectric Waveguide Isolator 92
Nobuyoshi Taguchi, Akihiro Imai, Hiromu Matsuda, and Keiichi Yubakami: Multiusable Printing Characteristics of Dye Transfer Sheets 101

NUMBER 11

Yoshimichi Yonezawa, Hiroshi Hattori, and Kazunori Itoh: A Method of Nonimpact Braille Printer by Electro-Thermosensitive Process 1
Hideaki Sone and Tasuku Takagi: A Measurement and a Classification of Arcing Phenomena of AgPd Alloy Contacts in Low Pressure 11
Tasao Soga, Fumio Nakano, and Moriaki Fuyama: Development of a High-Reliability Flip-Chip Packaging Reinforced by Resin 19
Masaharu Tadauchi, Keisuke Nakashima, and Kenji Nagai: High-Speed and High-Accuracy CMOS LSI for Document Image Signal Processor 28

Page

Koozoo Nakamura, Yasuyuki Kojima, Nagaharu Hamada, and Noboru Suemori: Document Image Compressing and Expanding LSI Processor 39
Tokuo Umeda and Yoshio Cho: Examination of Picosecond GaAs HEMT Photodetector . . 49
Akira Yata and Hiroyoshi Ikuno: Uniform Asymptotic Solution of Guided Modes in Inhomogeneous Slab Waveguides with an Even Polynomial Refractive Index Profile . 56
Akira Yata and Hiroyoshi Ikuno: Guided Modes of Diffused Slab Waveguides 64
Katsunori Sato, Hiroshi Echigo, and Tasuku Takagi: Fundamental Study on a Short Distance Measurement Method by Using a Sinusoidal Wave Oscillator with Light Path as Delay Line 70
Toshiaki Katagiri, Masao Tachikura, and Koushi Ishihara: Direct Core Observation Method Using Thermal Radiation of Silica Fibers with Dopants 77
Satoru Yamada, Syunji Sakai, Yasuo Iguchi, and Masaaki Sakamoto: Optical Scanning Image Sensor 86
Nobuhiro Funakoshi: Recording Material Characteristics Needed for Realization of Phase-Change Type Optical Disk 95

NUMBER 12

Hiroshi Kumagami, Kazuya Hayata and Masanori Koshiba: Finite-Element Formulation in Terms of the Magnetic-Field Vector for Axially Symmetrical Graded-Core Optical Fibers 1
Eiji Ikeda, Hideki Hasegawa and Hideo Ohno: Characterization of GaAs Regrowth Interfaces Grown by Metal-Organic Vapor Phase Epitaxy 12
Keijiro Itakura, Hiroaki Asada, Daisuke Ueda and Hiromitsu Takagi: Design and Fabrication of GaAs Hall IC with SCFL Schmitt Trigger 20
Fumio Kato: Theoretical Analysis of Resonant Tunneling through Finite Superlattices 28
Isamu Kato, Yasuyuki Sugiyama and Kotaro Sugita: Polymer Thin Film Waveguide Polarizer with a-Si:H Clad 39
Yoshiro Tomabechi and Kazuhito Matsumura: Reflection and Transmission Characteristics of Rectangular Dielectric Waveguide Junction with Transverse Displacement 46
Toshiaki Tanaka and Masayoshi Aikawa: Ridge-Shaped Narrow-Wall Directional Coupler. Tight Coupling and High-Power Handling Capability 54
Hitoshi Tamura and Sadao Kurazono: Analysis of Groove Guide for Short-Millimeter Waves 63
Hitoshi Shimasaki, Makoto Tsutsumi and Nobuaki Kumagai: An Analysis of Semiconductor Waveguides with Strip-Shaped Plasma and Their Applications . 74
Yoshinari Ishido and Toshiyuki Shiozawa: Analysis of High-Power Short Millimeter Wave Generation by Reflection at the Front of a Relativistic Electron Beam 83
Keiji Tsukada, Takuya Maruizumi and Hiroyuki Miyagi: A Multiple-ISFET Integrated with CMOS Interface Circuits 93
Nai Zhang, Asao Terukina, Hiromasa Ito and Humio Inaba: Compression of Picosecond Optical Pulses from a Strongly RF Modulated InGaAsP DBR Diode Laser Using a Gires-Tournois Interferometer 100
